

TRESPA FURNITURE FIT-OUT

Grade D & CNC

THE CLIENT

BDD Pharma – combining drug delivery expertise and clinical capabilities, BDD accelerate product development pipelines, enable life cycle management and create new value-added products. BDD uniquely combine onsite CRO and investigative site activities to offer clients a comprehensive integrated solution for conducting early phase clinical trials. Recognising that one size does not fit all, BDD specialise in providing responsive, flexible, and innovative solutions for drug delivery and clinical trials to their clients.

THE BRIEF

Guardtech Cleanrooms were engaged to upgrade BDD's existing Radiopharmacy facility in Glasgow MediCity to enable BDD to upscale their clinical trials, thereby helping their own clients bring innovative medicines more quickly to market. The upgraded GMP Grade D cleanroom would include a CNC laboratory and boast a comprehensive Trespa furniture fit-out.

“Every hurdle we encountered was overcome in style..”

Guardtech Group Installation Manager Miles Gardner said: “It was a real pleasure to work with such a dynamic and interesting client in the vibrant Glasgow MediCity community.

“There were a few challenges to face along the way, but the whole Guardtech Group team pulled together beautifully to ensure that every hurdle we encountered was overcome in style. Thank you to everyone involved in the Design and Install Teams and beyond for your support.”

THE FIT-OUT

To support the client's focus on development, manufacturing and clinical testing they opted for a Trespa fit-out. This included Trespa-topped steel framed island benching, sink cupboards, a single bowl with drainer inset into Trespa two-door cabinet, Trespa two-door cupboards, Trespa sink cupboards, two-door cupboard double sink, Trespa benches, Trespa three-cupboard + multi-drawers and a Trespa under bench four-drawer unit.

Trespa helps provide clinical agility for labs because of its exceptional resistance to chemicals, moisture, impact and scratches. They needed a robust solution to support their processes, and Trespa is ideal for demanding laboratory environments as it is easy to clean and highly durable.

Specifically, the "TopLab Plus" variant offers superior chemical resistance to even the most aggressive and crucial cleaning agents – essential for clinical agility. Another robust solution

is the use of stainless steel in their fit-out with Grade 304 stainless steel active transfer hatches, stainless steel one-person wall-mounted sensor sink, electropolished stainless steel full-length mirror in frame, stainless steel trolley, stainless steel storage rack, a short pre-rinse tap and a grade 304 stainless steel wall-mounted coat hook rack.
